DETAILED ACTION

Applicants Response to Restriction Requirement Acknowledged

1. Applicant's election with traverse the Group II along with amphetamine (alone) and Alzheimer's disease as the elected species is acknowledged. Claims 18, 20-25, 28-29 and 34 read on the elected species.

Accordingly, claims 1-17, 19, 26-27, 30-33 and 35 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected claims.

Information Disclosure Statement

2. Acknowledgement is made of applicant's submitting of the information disclosure statement (IDS) on 09/21/07. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement (IDS) has been considered by the examiner.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 18, 20-25 and 28-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 18, 28 and 29 recite "optionally, a methamphetamine, wherein at least about 85 mole percent of the total amphetamine and methamphetamine content of the composition is l-amphetamine" and "optionally, a methamphetamine, wherein at least about 95 mole percent of the total amphetamine and methamphetamine content of the

Art Unit: 1614

composition is l-amphetamine” respectively. When a methamphetamine is “optionally” not selected, the instant invention is reasonably construed that the claimed composition which is intended to administer for the treatment of Alzheimer’s diseases is prepared without the presence of methamphetamine. However, the phrases following “wherein” clause, “at least about 85 moles percent of the total amphetamine and methamphetamine content...” and “at least about 95 moles percent of the total amphetamine and methamphetamine content...”, require the presence of methamphetamine in said composition at all times. This inconsistency in the claims leaves the reader in doubt as to the meaning of the invention to which they refer, thereby rendering the definition of the subject-matter of said claims unclear.

For the examination purpose, the terms are construed as meaning “the amphetamine is at least about 95 mole percent l-amphetamine relative to the total amphetamine content of the composition” similar to claim 34.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1614

4. Claims 18, 20-25, 28-29 and 34 are provisionally rejected under the judicially created doctrine of double patenting over claims 1, 4, 17, 21 and 23 of copending Application No. 11/305495. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

Although the conflicting claims are not identical, they are not patentably distinct from each other because one having ordinary skill in the art would have known that the methamphetamine (l-methamphetamine) would be metabolized to amphetamine (l-amphetamine) in human body and would provide similar activity as the instantly claimed l-amphetamine in the treatment Alzheimer's disease. See Specification, page 20, lines 12-14 of the copending 11/305495 and Gilles et al., The Journal of Pharmacology and Experimental Therapeutics, Vol. 292, No. 3, pp. 1042-1047, 2000.

5. Claims 18, 20-25, 28-29 and 34 are rejected under the judicially created doctrine of double patenting over claims 1-23, 28-35 of U. S. Patent No. USP 7244769 and claims 1-28 of U.S. Patent No. 6828351.

Although the patented claims do not specifically identify the use of said l-amphetamine in the treatment of Alzheimer's disease, one having ordinary skill in the art, reading the entire specification (see for example USP'351, column 9, line 4-5, column 10, line 61, column 14, lines 57-58, column 19, lines 4-5, column 28, lines 58-59, column 48, line 10 and USP'769, column 12, line 27, column 14, lines 36-37, column 17, line 56, column 23, lines 65-66, column 29, lines 50-51, column 40, line 29, column 63, line 34), would have expected that l-amphetamine is useful for the treatment of Alzheimer's disease by improving in memory consolidation. Thus, using the specification as

“dictionary” in this ODP (obviousness-type double patenting) rejection analysis, the patented claims of US’769 and US’351 make obvious the instant invention.
